FLORA HONEY

Maximum Variety of Honey in India

INFUSED HONEY

Maximum Variety of Honey in India

Scan here:

About us:

We are a team of Engineers that aim to relocate bees back to their homes. Humans do not have any authority to manage bees.

However pesticides / insecticides and green desert have taken a toll on the pollinators, bees in particular. We want to save them and the earth in turn.

We specialise in beekeeping of different bees using scientific and latest technologies.

We deal in more than 40 types of honey. No one can beat us in India.

Pollination of different crops is our strength.

There are numerous brands of Honey available in the market with prices ranging from Rs 200/kg to Rs 2000/kg. Moreover, the honey being made available has the same taste/aroma/colour whenever you make a purchase. Markedly, bees, depending on the nectar (which varies for every region, season and flower around the area), produce honey with varied taste, aroma, viscosity and properties (read medicinal).

This drove us into the Honey Production field and the by-products like Bee Propolis, Honeycomb, Bee Wax, Bee Pollen, Bee Venom, and Royal Jelly.

Our company, One Bee Organic, produces honey and flowers from various regions. We and our associates have around 2500 bee hives (approximately 75 million Bees) and the honey produced is only sold.

Each batch is tested in Government Lab and the test results are fantastic.

The product comes from a group of Technocrats who are working tirelessly to give Honey FREE OF Preservatives, Added Flavour, Added Sugar, and Added Colour.

We care and are concerned about your HEALTH.

- Supply of Natural Honey
- Supply of Bee Hives and Beekeeping Equipments
- Beekeeper Training Programme
- Farmer Training Programme
- Apiculture Consulting
- Bee Farms Visits
- Pollination Support to Farmer and Agriculture Industry
- Swarm Removal and Relocation Activity
- Contract Farming with Farmer
- Contract Farming with Beekeeper
- Private Labelling or White Labelling (Owen Brand Labelling of our products)
- Honey Processing and Packaging
- Corporate Gift design and packing
- Bee Hive Maintenance Agreement
- Corporate Social Responsibility (CSR)
- Hydroponics
- Apitherapy or Bee Sting therapy

Process of collecting Flora Honey:

Location Selection:

Beekeepers select Flora Site flower-rich, pesticide-free areas to maintain honey quality.

1

Placement of Beehives:

Beehives are strategically positioned near abundant flower farms, ensuring easy access to their nectar for bees.

2

Honeybee Activity:

Honeybees collect nectar from flowers using their proboscis and store it in their honey stomach

3

Removal of Honeycombs:

Beekeepers carefully remove honeycombs from hives, then transport them to extraction facilities.

6

Ripening and Sealing:

As honey matures and water content decreases, worker bees seal honeycomb cells with beeswax to preserve it

5

Extraction of Nectar:

Honey Bees extract nectar from the Uni-flowers and store it in their honeycombs.

4

Uncapping:

Honeycombs are opened using special tools, removing the wax to reveal the honey-filled cells.

7

Extraction:

Honeycomb frames spin rapidly in a honey extractor using centrifugal force, flinging out the honey after uncapping.

8

Filtration:

The extracted honey is then passed through a series of filters to remove any impurities such as beeswax, Honey Bees or debris. This helps in obtaining clear and pure honey.

9

Quality Control:

The filtered honey undergoes rigorous quality control tests to ensure that it meets the standards for flora honey. This includes tests in government Laboratories as per FSSAI rules.

10

Packaging & Labeling:

It is typically packaged in glass jars or food grade bottles to maintain its freshness and quality, and then it's labeled with relevant information.

FLORA HONEY

Maximum Variety of Honey in India

FLORA HONEY

- Tulsi Flora Honey
- Acacia Flora Honey
- Mustard Flora Honey
- Karanj Flora Honey
- Lychee Flora Honey
- Forest Flora Honey
- Coriander Flora Honey
- Alfalfa Flora Honey
- Drumstick Flora Honey
- Berry Flora Honey
- Neem Flora Honey
- Ajwain Flora Honey
- Jamun Flora Honey
- Sesame Flora Honey
- Flora Honey Sticks/Straw
- Flora Honey Sachet

Tulsi Honey

Tulsi is a rich source of oxidants that helps in lowering stress levels. Tulsi facilitates treating diseases.

- Enhances the immune system.
- Fighting against infections and fever.
- Memory improvement and energy boosts & help in achieving good skin.
- Benefits in cold, cough, infected throat.

Acacia Flora Honey

Acacia honey helps ease stomach and throat irritation. Good for healing wounds and excellent source of water-soluble fibers.

- Rich in antioxidants (Potential benefit).
- May prevent and treat ACNE (Muhanse).
- Increases Athletic Performance.

Mustard Flora Honey

Mustard has remarkable amounts of calcium, vitamins C, A & K & it is a good source of fiber, selenium, magnesium and manganese.

- It helps with cholesterol Levels.
- It helps to maintain Glycogen levels.
- High nutrient value.
- Improve Cardiovascular Health.

Karanj Flora Honey

- Can be good in Piles.
- Relieves Bloating and flatulence.
- Helps in Constipation & Stomach Ailment.

Multi Flora Honey

It has a rich & strong taste and is the most common Honey. It is produced by a variety of crops, flowers & herbs.

- Helps lower your risk of heart disease.
- Helps in fighting infections.
- Honey helps beautify Skin and Hair.

Eucalyptus Flora Honey

Eucalyptus contains antioxidants and is a natural relaxant.

- It is loaded with nutrients, antioxidants, flavonoids, and healing compounds, that keeps people healthy.
- It helps reduce ulcers & other bacterial gastrointestinal disorders.

Sheesham Flora Honey

- It is used for toothache & gum problems.
- It's beneficial for women who have menstrual problems.
- It's also used for good digestion and stomach ache.
- It helps in blood pressure and improves blood circulation.

Saunf Flora Honey

Saunf is a good source of calcium, vitamin C, magnesium, potassium and manganese.

- Helps in heartburn & digestion system.
- Helps in bloating and loss of appetite.
- Works as an antacid.
- Good laxative.

Lychee Flora Honey

- It contains protein, proanthocyanins & polyphenolic compounds.
- It improves blood circulation, & protecting the body from various diseases & afflictions.
- It has a wealth of potassium & organic compounds.
- Anti-inflammatory.

Forest Flora Honey

It has a great taste and is moderately sweet and has medium-dark amber color.

- Takes a long time to crystallize.
- Rich antibacterial properties.
- Benefits in Sour throat.
- Lower Glycemic index so good for weight management.

Coriander Flora Honey

Coriander provides us with dietary fiber. It is rich in vitamin C and protein, manganese, iron & magnesium.

- Curtails in Hyper- acid, ulcer, constipation, bloating & indigestion.
- Liver Protection averts nausea & Blood circulation is improved.
- Cholesterol level reduction.
- Male Potency.

Alfalfa Flora Honey

- Antioxidant
- Antibacterial
- Anemia
- Weight Loss
- Rheumatic Pain Reduction

Drumstick Flora Honey

Drumsticks are rich in antioxidants & bioactive compounds.
Packed with nutrients.

- It retains calcium in the body.
- Reduces allergy symptoms.
- Relieves from arthritis & rheumatism.
- Boosts energy, stamina & immunity.

Berry Flora Honey

- Good Antibacterial Properties especially for the throat.
- Improves Energy Level.
- Weight Management.
- Skin will glow.

Neem Flora Honey

In Ayurveda medicine, Neem is used for eye disorders, bleeding nose, intestinal worms, loss of appetite, skin ulcers, cardiovascular diseases, and fever.

- Lowers high blood pressure.
- Good for the eyes as a source of antioxidants.
- Great for skin problems such as acne & scars.
- Useful in alleviating respiratory issues like bronchitis and asthma.

Ajwain Flora Honey

Ajwain is well known for its health benefits. These benefits are transferred to Ajwain flora Honey.

- It is good for gastrointestinal problems.
- It is good for sore throat, cough, and cold.
- It is good hormone leading to suppression of appetite, thus helping in weight loss & control.

Jamun Flora Honey

Jamun is loaded with vitamin C and Iron. Rich in Vitamin A & good source of potassium, it has antibacterial, anti-infective and anti-malarial properties.

- Good for a healthy heart.
- Prevents infection.
- Healthy eyes and skin.
- It improves hemoglobin counts

Sesame Flora Honey

- Weight loss
- Stomach- Intestine conditions
- Strengthens Bone Marrow
- Physical Endurance
- Stimulates mental activity

Flora Honey Sticks/Straw

- Sticks/Straw/Sachet are made of food-grade plastic.
- These sticks contain 8g of flora honey and children can easily eat it.
- They come in a bundle of different varieties of honey.

Flora Honey Sachet

- Sticks/Straw/Sachet are made of food-grade plastic.
- These sticks contain 8g of flora honey and children above one year of age can easily eat it.
- They come in a bundle of different varieties of honey.

Process of making Infused Honey:

Infused Honey Preparation:

We chose fine and tested Multi Flora Honey as per FSSAI for particular viscosity and quantity.

1

Selection of Spices, etc

We select only organic & best quality spices / herbs / condiments.

2

Mixture Ratio:

A particular ratio of Honey & Spices, Herbs & Condiments is mixed.

3

Mixing of Infused Honey:

Daily the mixture of Honey & Spices is vibrated, so that extraction is maximum.

5

Sun Exposure:

Then the mix is placed in the sun for maximum extraction of oil & ingredients and not to lose the quality.

4

Sun Exposure Duration:

Sun exposure / duration is dependant on type of infused honey.

6

Quality Control:

The Infused Honey undergoes rigorous quality control tests to ensure it meets the standards.

7

Filtration:

The mixture is filtered in cotton cloth, bottled and labelled.

8

Packaging & Labeling:

It is typically packaged in glass jars or food-grade bottles to maintain its freshness and quality, and then it's labelled with relevant information.

INFUSED HONEY

Maximum Variety of Honey in India

INFUSED HONEY

- Ginger Infused Honey
- Garlic Infused Honey
- Brahmi Infused Honey
- Giloy Infused Honey
- Chocolate Infused Honey
- Peppermint Infused Honey
- Ashwagandha Infused Honey
- Coffee Infused Honey
- Ashtamrut Infused Honey
- Amala Infused Honey
- Cinnamon Infused Honey
- Cardamom Infused Honey
- Saffron Infused Honey
- Turmeric Infused Honey
- Lemon Infused Honey
- Bee Pollen Infused Honey
- Shilajit Infused Honey
- Bee Propolis Infused Honey
- Infused Honey Sticks/Straw
- Infused Honey Sachet

Ginger Infused Honey

- Cough, cold and flu relief
- Ease Nausea
- Antioxidant Properties
- Protects Heart Health

Garlic Infused Honey

- It helps with digestion.
- Reduces inflammation.
- Fights the cold and flu

Brahmi Infused Honey

- Good for enhancing intelligence and memory.
- It helps children avoid diseases.
- May prevent anxiety and stress.

Giloy Infused Honey

- Strong immunity booster and improves digestion.
- Improves blood circulation and makes the body strong.
- immunity booster.
- Reduces stress and anxiety and helps in increase of blood platelets.

Chocolate Infused Honey

- Natural sweetener
- Adds chocolate flavor to beverages and foods
- Rich in antioxidants
- Contains trace minerals and vitamins.
- May have anti-inflammatory effects.

Peppermint Infused Honey

- Peppermint is refreshing & stimulating.
- Good stress reliever.
- It brings clarity & focus while relaxing us.

Ashwagandha Infused Honey

- Reduces stress and anxiety & Helps in weight loss.
- It helps prevent insomnia & a Strong immunity booster.
- Antibacterial & antiviral properties & anti-inflammatory.

Coffee Infused Honey

- Adds coffee flavor to beverages & foods
- Rich in antioxidants
- Contains trace minerals and vitamins
- May support a healthy immune system
- May have anti-inflammatory effects.

Ashtamrut Infused Honey

- Reduces stress, anxiety & Helps in weight loss.
- Antibacterial & Antiviral properties & Anti-inflammatory.
- Cough, Cold and flu Relief.

Amala Infused Honey

- Rich in Antioxidants
- Boosts Immunity
- Hair Health
- Supports Digestive Health
- Heart Health

Cinnamon Infused Honey

- Plush vitamin content in cinnamon includes vitamins A, E, D, and K.
- Acne and minor skin infections.
- Age-related spots and wrinkles.
- Reducing cholesterol levels.

Cardamom Infused Honey

- Healthy digestion
- Rich in antioxidants
- Improves liver health
- Immunity booster

Saffron Infused Honey

- Delicious taste
- Boosting energy levels
- Healthy skin
- Improving mood

Turmeric Infused Honey

- Wound-healing properties
- Help in common flu
- Great for the skin
- Helps digestive systems

Lemon Infused Honey

- Feel more energetic.
- Super Source of Antioxidants,
- Minerals & Vitamin B6.
- Maintaining Bone Health

Bee Pollen Infused Honey

- Nutrient-rich: This can enhance the nutritional profile of honey.
- Antioxidants: Can help protect cells from oxidative damage.
- Allergy relief: Reduces seasonal allergies
- Skin health: Added beauty products for moisturizing and soothing properties.

Shilajit Infused Honey

- The combination of Shilajit & Honey will give the best performance you can expect.
- Shilajit resin & extract are mixed in honey in proper proportions based on scientific findings.
- This infused honey will give power to perform and person will be energetic.

Bee Propolis Infused Honey

- Antibacterial properties: Treating a variety of infections and wounds.
- Immune system: It can boost the immune system,
- Anti-inflammatory properties: Reduces swelling and pain in arthritis and gingivitis.
- Oral health: Helping to prevent tooth decay and gum disease.
- Skin health: It can be used to improve skin health

Infused Honey Sticks/Straw

- Sticks/Straw/Sachet are made of food-grade plastic.
- These sticks contain 8g of infused honey and children can easily eat it.
- They come in a bundle of different varieties of honey.

Infused Honey Sachet

- Sticks/Straw/Sachet are made of food-grade plastic.
- These sticks contain 8g of infused honey and children can easily eat it.
- They come in a bundle of different varieties of honey.

Honey-bee Products:

You will be surprised to know the different products honey bees can make. Don't go by their size. They are certainly very small but make wonderful products for the use of human beings. They of course perform very important activity of pollination but at the same time produce products that are impossible to be synthetically made.

Some examples are Bee Pollen, Bee Propolis, Bee Wax, Bee Bread, Bee Venom, Honey Comb, and Royal Jelly.

HONEY-BEE PRODUCT

- Bee Pollen
- Bee Pollen Capsules
- Bee Pollen Tablet
- Bee Bread
- Bee Propolis
- Bee Propolis Powder
- Bee Propolis Tablet
- Bee Propolis Tincture
- Bee Venom Powder
- Bee Venom Capsule
- Bee Venom Cream
- Bee Venom Gels
- Bee Wax
- Bee Wax Candle
- Bee Wax Cream
- Honey Comb (Apis Mellifera)
- Honey Comb (Apis Cerena)
- Honey Comb
- Bottled Trigona Bee Honey
- Royal Jelly
- Royal Jelly Capsule
- Royal Jelly Powder

Bee Pollen

- Bee pollen is considered by many health experts to be a perfect food due to its high levels of nutrients, vitamins, protein, and amino acids.
- It is a great natural protein supplement.
- Nature's most completely nourishing food.
- Bee pollen contains nearly all nutrients required by humans.
- The taste is sweet gets digested very fast

Bee Pollen Capsules

- Boosts energy and endurance
- Supports immune system
- Supports weight loss
- Improves skin health
- Supports brain function and memory

Bee Pollen Tablet

- Nutrient-rich: This can enhance the nutritional profile of honey.
- Antioxidants: Can help protect cells from oxidative damage.
- Allergy relief: Reduces seasonal allergies
- Skin health: Added beauty products for moisturizing and soothing properties.

Bee Bread

- Rich in natural antioxidants
- Boosts and supports liver health
- Natural ability to fight inflammation
- Strengthens the immune system
- Alleviates symptoms of menopause

Bee Propolis

- It is in raw form & to be further processed by the purchaser for consumption
- It is used by bees as a sealant for unwanted open spaces in the hive.
- Antibacterial, Antiviral, Antifungal, and Anti-inflammatory properties.
- Propolis liquid can be directly applied to the skin to aid healing.

Bee Propolis Powder

- Immune system support
- Antimicrobial and Antiviral properties
- Wound Healing
- Pain relief, Antioxidant activity
- Cold and flu prevention
- Tooth and gum health

Bee Propolis Tablet

- Immune System support
- Antimicrobial and Antiviral properties
- Wound Healing
- Pain relief, Antioxidant activity
- Cold and flu prevention
- Tooth and Gum Health

Bee Propolis Tincture

- Supporting oral health and reducing the risk of tooth decay and gum disease
- Boosting the immune system and fighting infections
- Providing antioxidant and antibacterial properties
- Reducing the symptoms of allergies and hay fever
- Supporting skin health and promoting wound healing

Bee Venom Powder

- Apitherapy is an alternative medicine to treat and prevent illnesses, pain, and more.
- Available in many forms like Extracts, Supplements, Moisturizers, and Serums.
- You can purchase bee-venom products, such as moisturizers, lotions, and lozenges,
- Bee venom injections can be administered by healthcare professionals.
- It is used in live bee acupuncture or bee-sting therapy — live bees are placed on your skin and a sting is induced.

Bee Venom Capsule

- Reducing inflammation and pain
- Improving joint mobility
- Boosting the immune system
- Treating arthritis

Bee Venom Cream

- Anti-inflammatory properties: Reduces redness, swelling, and pain in the skin.
- Collagen Stimulation: This can improve the appearance of fine lines and wrinkles.
- Acne Treatment
- Skin Rejuvenation: Helps rejuvenate the skin, giving it a more youthful appearance.

Bee Venom Gels

- Pain Relief : With conditions such as arthritis, sore muscles, and joints.
- Anti-inflammatory
- Stimulation of Blood Circulation: Improves the overall health and appearance of the skin.
- Improved skin texture

Bee Wax

- When combined with skincare ingredients, it can block out irritants while allowing the skin to breathe
- It contains anti-inflammatory, Anti-bacterial, and Anti-viral properties. These qualities offer the perfect balance of nourishment to calm the skin, keep it clean and bacteria-free, heal wounds, and fight infection.
- Beeswax contains Vitamin A, which helps protect skin cells.
- Beeswax helps with dry skin itchiness, dermatitis or eczema.

Bee Wax Cream

- Beeswax cream contains beeswax as a key ingredient.
- Moisturizing: it helps draw moisture to the skin and keep it hydrated.
- This can be especially beneficial for dry or chapped skin.
- Protective barrier: Beeswax forms a protective barrier on the skin
- Natural and gentle: beeswax cream is generally well-tolerated by most skin types, even sensitive skin.

Bee Wax Candle

- Beeswax candles are a great alternative to traditional paraffin candles. They are made from natural beeswax, a renewable resource produced by honeybees.
- They burn cleaner. Beeswax candles produce minimal smoke and soot, making them a better choice for people with allergies or asthma.
- They last longer, smell better, and has a natural honey scent that is pleasant and relaxing.
- If you're looking for a natural, eco-friendly, and long-lasting candle, a beeswax candle is a great option.

Honey Comb (Apis Mellifera)

- A honey comb box, also known as a beehive box or brood box, is a shelter designed specifically for honey bees (Apis Mellifera) used in beekeeping.
- These boxes provide a space for the bees to build their honeycomb, raise their young, and store honey.
- Honey comb boxes are an essential part of beekeeping.
- They provide a safe and secure home for honey bees, which allows them to thrive and produce honey.

Honey Comb (Apis Cerena)

- A honey comb box, also known as a beehive box or brood box, is a shelter designed specifically for honey bees used in beekeeping.
- These boxes provide a space for the bees to build their honeycomb, raise their young, and store honey.
- Apis Cerana, also known as the Asiatic honey bee, is a different species of honey bee than the Western honey bee (Apis Mellifera).
- Apis Cerana bees are typically kept in hives that are designed specifically for their needs.
- Honey production: Apis Cerana colonies typically produce less honey than Apis Mellifera colonies.

Honey Comb

- Bee honeycomb is a marvel of nature, a meticulously crafted structure made by honey bees from beeswax to store honey and pollen.
- These hexagonal chambers are not only efficient in terms of space usage but also incredibly strong.
- Honeycomb can be eaten by humans and is prized for its unique flavor and texture.
- It can be enjoyed on its own or used as an ingredient in cooking and baking.
- So you get honey sealed by bees 100% pure honey is assured. Can be directly consumed
- However, it's important to note that honeycomb is not safe for children under 1 year old due to the risk of infant botulism.

Bottled Trigona Bee Honey

- We can provide honey in glass bottle Directly taken from hive.
- These bottles are provided in super hence will not have any eggs or brood.
- This honey will be in original capped cups.
- This will ensure 100% originality of honey.

Royal Jelly

- Improvement in skin & hair health
- Improves immunity
- Enhancement of Energy levels & Productivity
- Brain functions sharpened
- Hormonal imbalance stabilized
- Fights allergies.

Royal Jelly Capsule

- Improvement in skin & hair health
- Improves immunity
- Enhancement of Energy levels & Productivity
- Brain functions sharpened
- Hormonal imbalance stabilized
- Fights allergies.

Royal Jelly Powder

- Improvement in skin & hair health
- Improves immunity
- Enhancement of Energy levels & Productivity
- Brain functions sharpened
- Hormonal imbalance stabilized
- Fights allergies.

Bee Hive:

Honey bees live either in a closed dark or in an open environment. The bees that live in an open environment are very difficult to manage or put in a hive. Whereas honey bees living in closed dark environments can be domesticated or managed.

Presently we have beehives for mellifera, cerena indica, trigona single bee, polyester bee, leafcutter bee, bumble bee, भंवरा.

BEE HIVE PRODUCTS

- Apis Mellifera Bee Hive
- Apis Cerena Indica Bee Hive
- Stingless / Trigona Bee Hive
- Urban Beekeeping
- Automatic Flow Hive
- Automatic Flow Hive Frame
- Bee Hotel

Apis Mellifera Bee Hive

- The Apis Mellifera beehive, also commonly known as the Italian honey bee, is a complex and fascinating structure
- The hive consists of several parts
- Honeycomb: This is the heart of the beehive, a marvel of engineering
- Honey supers: These are chambers located above the brood chamber
- Frames: These are wooden frames that fit inside the beehive
- Based on Location it can also be transported by us.

Apis Cerana Indica Bee Hive

- The Apis Cerana Indica is also known as the Indian honey bee.
- Unlike their larger Apis Mellifera cousins, Apis Cerana Indica bees are adept at living in natural cavities and can also thrive in man-made beehives.
- Based on Location it can also be transported by us.

Stingless / Trigona Bee Hive

- Stingless bee hives, also known as Trigona hives, are fascinating abodes built and maintained by stingless bees
- Stingless bees lack a stinger and instead use a bite for defence.
- These hives provide a home for the entire colony, with a few hundred to several thousand bees.
- The Apis Mellifera beehive, also commonly known as the Italian honey bee, is a complex and fascinating structure

Urban Beekeeping

- The concept of Urban Beekeeping involves the placement and maintenance of beehives in cities.
- A combination of various bees can be done which will educate city people about beekeeping.
- Complete maintenance of Urban Beekeeping can be undertaken by us.
- This will ensure successful beekeeping in cities.

Automatic Flow Hive

- Honey Flow Beehive House with 6 pcs Flow Frames
- Usually, this box is placed on top of the brood box.
- Honey Extraction is very easy just one lever is to be turned
- No need for a Honey Extraction Machine.
- It will not have any eggs and brood so pure honey will come.
- Minimum disturbance to Bees.
- Long life and faster honey production.

Automatic Flow Hive Frame

- In case you need only frames we provide them
- This also comes with the operating system.
- Outside wooden box to be completed by the customer.

Bee Hotel

- Bee Hotel is designed to attract solitary bees like Polyester Bees, Horn-faced Bees, Leafcutter Bees, Mason Bees, and Bumble Bees.
- These bees are excellent pollinators and their lifecycle can be easily managed.
- They are suited for net or polyhouse agriculture pollination.

Beekeeping Equipments:

When you are doing scientific beekeeping you need to have tools that are proven and do not harm the bees. The equipment being provided is of standard quality and standard sized. The material used does not harm the bees. We use food-grade materials.

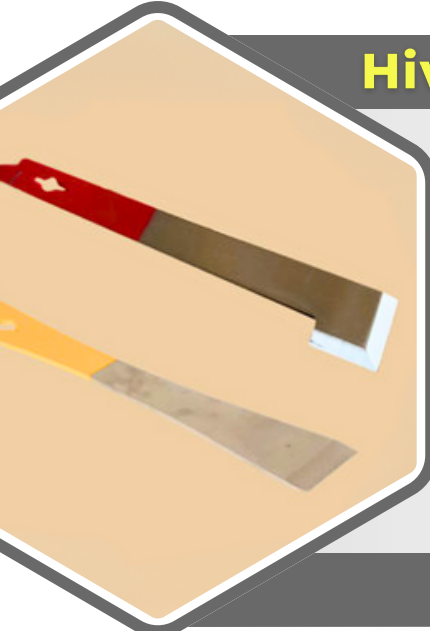

BEEKEEPING EQUIPMENTS:

- Hive Tools
- Honey Extractor
- Smoker
- Uncapping Tools
- Bee Pollen Trap
- Bee Propolis Strip
- Queen Excluder
- Feeder
- Royal Jelly Production Kit
- Queen Rearing Kit
- Bee Venom Collector
- Honey Extraction Net
- Plastic Foundation Sheet (Cerena)
- Plastic Foundation Sheet (Mellifera)
- Queen Cage
- Migration Gate
- Queen Gate
- Ventilator for Bee Hive
- Beekeeping Equipment set
- Bee Foundation Sheet
- Bee Veil
- Bee Protection Suit (3 Layer)
- Bee Protection Jacket (3 Layer)
- Hand Gloves (3 Layers)
- Bee Protection Suit (Cotton)
- Bee Protection Jacket (Cotton)
- Hand Gloves Cotton
- Hand Gloves Rubber

Hive Tools

- This tool is very inexpensive and is also strongly recommended by Bee Farms Products. It is required as bees use propolis to join frames and for insulation. Best choice for separating hive boxes, prying out frames, and scraping wax and propolis off of your bee boxes and frames
- Material: Stainless Steel with wooden handle.
- Product Name: J Shape Hive Tool; Package Content: 1 x J Shape Hive Tool.
- The most used piece of beekeeping equipment.
- Used to separate covers, remove frames, scrape propolis, etc.

Honey Extractor

- Suitable for Apis Mellifera Type-A Box Frames
- Honey Bee extractor – 12 frames(SS 304)
- Special gear set for easy handling.
- SS frame buckets, Suitable for Brood Frames.
- Quality workmanship, with Easy spin gear for fast spinning.

Smoker

- Smoking is essential when dealing with bees, as this keeps bees a little peace and is not stressed during handling. This is for your protection also.
- This is a new bee smoker made with Galvanized with a heat shield.
- HEAT SHIELD: The heat shield protects the user from touching the hot canister.
- LET THE BEES BE QUIET: The smoker produces safe cool smoke to help calm bees.

Uncapping Tools

- Uncapping Knife: This is a long, thin knife with a sharp blade that is used to slice off the wax capping from the honeycomb.
- Essential part for honey harvesting

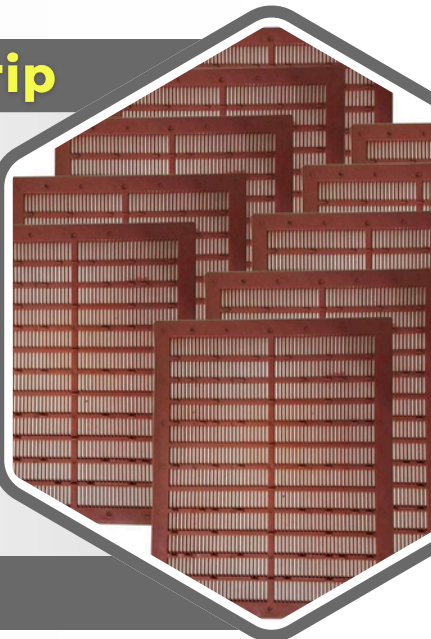

Bee Pollen Trap

- A bee pollen trap is a device that collects some of the pollen.
- The pollen accumulates in the collection tray below the trap.
- Pollen is a valuable product that can be sold or used for personal consumption.
- it is suitable for hives with long durable quantities.

Bee Propolis Strip

- Clean propolis can be collected by placing it on hives.
- Durable and flexible to remove propolis.
- Standard size.

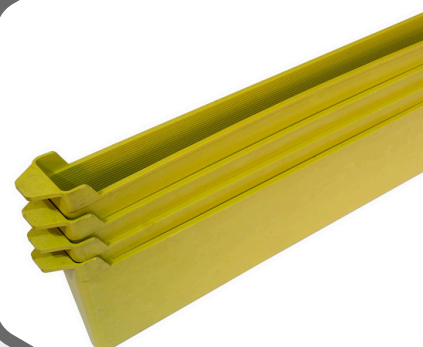

Queen Excluder

- A queen excluder is a specialized barrier for a queen.
- Confine the Queen to the Brood Chamber: This ensures the queen lays eggs only in the brood chamber frames and keeps honey free of eggs and brood.
- Miticide Application: Some miticides, and medications are used to control varroa mites.

Feeder

- Minimum loss of bees by drowning of bees
- Gets inside the hive in place of a frame so is very neat and clean.
- It Can be cleaned easily.
- Long-lasting.

Queen Rearing Kit

- Scientifically the queen can be reared.
- All tools are of good material.
- It is a proven method.

Royal Jelly Production Kit

- Royal jelly production kits are available for beekeepers interested in harvesting this valuable substance.
- All materials are of good quality.
- Royal Jelly extraction is very profitable.

Bee Venom Collector

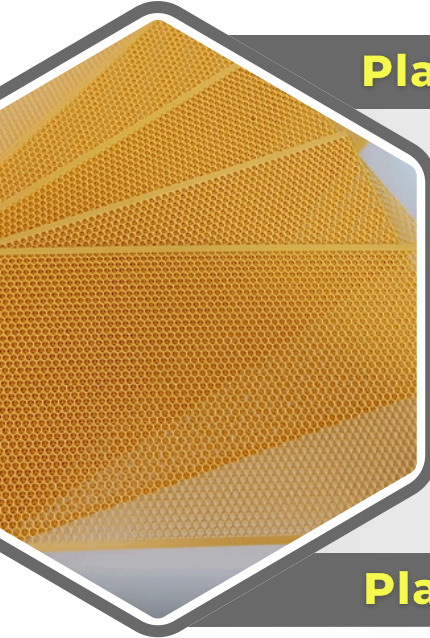

- Developed by our company.
- It can collect venom from 4 to 10 hives simultaneously.
- No injury to bees.
- A UV-protected plastic dome keeps sunlight away.

Honey Extraction Net

- During Honey Extraction Bees get attracted and disrupt the process.
- Standard size bee net.
- Loss of bees is avoided.
- Can last long.

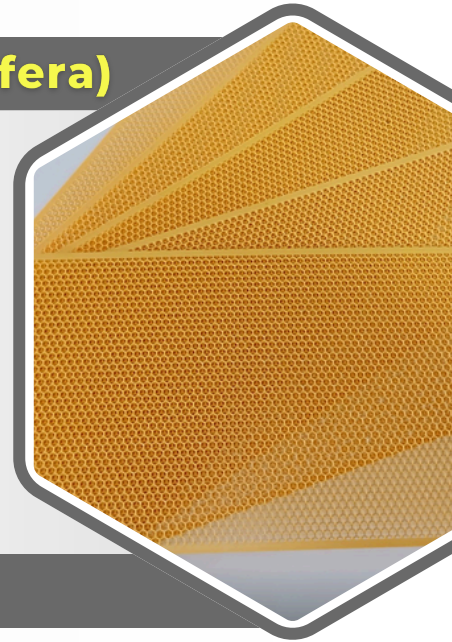

Plastic Foundation Sheet (Cerena)

- They are made of food-grade plastic.
- Increases honey production.
- Cell size is standard.
- Eggs are not laid by the queen.

Plastic Foundation Sheet (Mellifera)

- They are made of food-grade plastic.
- Increases honey production.
- Cell size is standard.
- Eggs are not laid by the queen.

Queen Cage

Our Services

We provide our services to help farmers in pollination and train people to start beekeeping on a commercial basis.

We also undertake contract farming to help with better production and better quality. We also undertake white labelling.

OUR SERVICES

- Supply of Natural Honey
- Supply of Bee Hives and Beekeeping Equipments
- Beekeeper Training Programme
- Farmer Training Programme
- Apiculture Consulting
- Bee Farms Visits
- Pollination Support to Farmer and Agriculture Industry
- Swarm Removal and Relocation Activity
- Contract Farming with Farmer
- Contract Farming with Beekeeper
- Private Labelling or White Labelling (Owen Brand Labelling of our products)
- Honey Processing and Packaging
- Corporate Gift design and packing
- Bee Hive Maintenance Agreement
- Corporate Social Responsibility (CSR)
- Hydroponics
- Apitherapy or Bee Sting therapy

Supply of Natural Honey

Our company is producing 40 types of honey, no one can match in India for the varieties.

- We can supply honey in retail and bulk quantities also.

We have exported to various countries also. We have our own hives and are supported by good and sincere beekeepers throughout the country.

Supply of Bee Hives and Beekeeping Equipment's

We have Apis Mellifera, Apis Cerena Indica, Trigona Stingless Bees, Solitary Bees, Bumble Bees, Leafcutter Bees, etc.

- We also provide trained beekeepers to take care of the beehives of clients.
- All beekeeping related equipments are available and can be supplied in retail and bulk quantities also.

Beekeeper Training Programme

We provide beekeeping training online and offline also. We expect before taking up this training, you will be a little bit convergent with beekeeping.

- We also facilitate during training visits to beekeeping sites.
- We also provide advanced training in commercial beekeeping. 3 months of support is also provided after training.

Farmer Training Programme

We can organize a beekeeping training program for freshers and also train in commercial activities.

- The training program comprises of theoretical and site visits also.
- This training will make them self-reliant for beekeeping.
- Post training we also support them.

Apiculture Consulting

A comprehensive consulting program can be organized on the subject of apiculture.

- We have experts in the field who can take care of such consultation needs.
- These consultations give the overall prospective of apiculture.

Bee Farms Visits

We are having our own beehives of varieties of bees.

- Scheduled visits can be made for different classes of people like students, common people, & people interested in apiculture.
- The trained beekeeper will be available to give guidance during such visits.

Pollination Support to Farmer and Agriculture Industry

Because of pesticides and insecticides, pollination agents, pollination insects are not available in the field.

- We provide scientific-based pollination support by placing different bees based on the crop and geography available.
- The bees are provided on a rental basis, thus, farmer need not to worry about beekeeping.

Swarm Removal and Relocation Activity

Pan India we guide people on how to tackle bees in the vicinity of residential companies or any other area.

- We don't allow the killing of the bees and Swarm removal is guided by the principle of taking care of bees.
- This service is available pan India.

Contract Farming with Farmer

We also provide Contract Farming wherein full support of crop selection and its pollination is taken care of. This results in better crop management and high profits to the farmer.

- This service is available pan India.

Contract Farming with Beekeeper

Contract Farming with Beekeepers is available.

- We support beekeepers for all beekeeping-related issues and support them in the migration & placement of beehives in a farmers field.
- We also purchase entire honey from beekeepers.
- Beekeepers become a part of our extended family.

Private Labelling or White Labelling (Owen Brand Labelling of our products)

We also provide White Labelling based on our clients requirements.

- Based on the quantities we can also provide white labelling in different sizes and shaped bottles.
- We can also design labels based on the requirements.

Honey Processing and Packaging

The client can supply their own honey which can be processed from our end. The same can also be packaged as per the clients requirements.

Corporate Gift Design and Packing

Our design team can undertake Gifts & Packing Designs based on clients requirements.

- We can offer different inhouse designs to assist clients for making it easy for the clients to select.

Bee Hive Maintenance Agreement

We have select team of experienced beekeepers. Clients hive will be maintained & assurance of minimum honey production can also be assured. Such maintenance agreements can be of long duration also.

Corporate Social Responsibility (CSR)

CSR activities of the client can be undertaken. This activity will be undertaken from start to finish based on clients requirement

- This CSR activity can be taken up in villages and in cities also.

Hydroponics

- We provide consultancy services in the installation of commercial hydroponic systems.
- We also provide the Janta Model for people who do not have previous experience in hydroponics.
- We have 100% water-soluble nutrients, which can also be provided in bulk quantities.
- Majority of nutrients are imported.

Apitherapy or Bee Sting Therapy

- Certain ailments can be attended by bee sting therapy.
- Doctors have to prescribe the same along with the doses and we provide live stinging by bees at designated bodyparts
